## **DETAILED ACTION**

### ***Drawings***

1. This application has been filed with informal drawings, which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

### ***Double Patenting***

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101, which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 1 – 38 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 – 27 of copending Application Nos. 09/819,584 which is a CIP of 09/745,235. Although the conflicting claims are not identical, they are not patentably distinct from each other because they claim modifications that would be obvious to one having ordinary skill in the art at the time the invention was made. In this case, claims 1 and 2 would involve the removal of the decapod-shaped lure comprising a body and a tail; claim 12 would involve the slot of the earlier disclosure of Application No. 09/745,235; claims 25, 30 and 37 would require no changing; claim 33 would require the addition of a barb guard as disclosed in Application No. 09/745,235, Figs. 1, 2 and 6 – 11.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
